

SUPPORTING REGISTERED APPRENTICESHIPS

2022 HEALTH CAREERS REGISTERED APPRENTICESHIP PROGRAM - GRANT AWARDEES

Iowa's Registered Apprenticeship Programs help employers create a reliable, continuous pipeline of highly skilled workers while helping talented students jump-start rewarding careers.

The Health Careers Registered Apprenticeship Program is a new grant opportunity built on an innovative learning model that introduces health care opportunities to high school students. The grant awards Iowa communities to help launch or expand innovative health care registered apprenticeship programs across the state, which will recruit students to become a certified nursing assistant and qualify for a number of health care careers while getting paid, all before leaving high school.

Congratulations to the 2022 Awardees
